Takeda

...a key resource in getting the team on track and successfully communicate between the API, and UDP team to ensure each of the teams were following industry best practices as well as follow application architecture

I wanted to give Ty a shout-out because he's been a rock star and delivering quality work despite dealing with resource constraints, scope changes, project delays, product team prioritization changes, etc.

...extremely responsive, provided clear guidance and helped navigate the process of enabling cross company access...it was nice to have a real contact to work with
